

Goa Cashew-2 (Tiswadi-3)

Team: A. R. Desai, J. R. Feleiro, J. Ashok Kumar and V. S. Korikanthmath

Nut characteristics	
Nut weight	9.6 – 10.2 g
Nut yield (at 10 th yr of age)	8-10 kg/tree
No. of Nuts / kg	105 – 110
Shelling Percentage	28.82 - 29.55 %
Kernel weight	2.26 – 2.62 g (Av. 2.42g)
Whole Kernel Counts per lb	W 180 – W 210

Apple Characteristics	
Apple Colour	Yellowish orange
Apple Shape	Cylindrical
Av Weight of apple	105 g
Juice Contents	68.2 – 72.0 %
TSS contents	10.8 – 12.2 ° B

Goa Cashew -3 (Ganje-2)

Team: A. R. Desai, J. R. Faleiro, J. Ashok Kumar and Narendra Pratap Singh

Nut Characteristics	
Av Nut Weight.	8.2 g
Number of Nuts / kg	130-140
Shelling Percentage	29.5 %
Kernel weight	2.26- 2.28 g
Whole Kern. Counts per lb	W 210 – W 240

Apple Characteristics	
Apple Colour	Yellow
Apple Shape	Rounded
Av Weight of apple	94.0 g
Juice Contents	69.17%
TSS contents	12.2 ° B

Nut yield : 10 – 12 kg/tree at 10th year of age

Goa Cashew - 4 (KN-2/98)

Team: A. R. Desai, J. R. Faleiro, J. Ashok Kumar and Narendra Pratap Singh

Nut Characteristics

Av Nut Weight.	8.2 g
Number of Nuts / kg	120-125
Shelling Percentage	29.59 %
Average Kernel weight	2.68 g
Whole Kernel Counts/lb	W 210 – W 240

Apple Characteristics

Apple Colour	Red
Apple Shape	Conical
Av Weight of apple	107.5g
Juice Contents	71.14 %
TSS contents	13.8 ° B

Nut yield : 12-15 kg/tree at 10th year of age

Goa Dhan 1 (KS-12)

Team: Manohara, K. K. and Narendra Pratap Singh

It is a high yielding salt tolerant rice line developed through pure-line selection from the local salinity tolerant landrace Korgut, for the **coastal saline soils** of Goa and adjoining regions.

It is a semi-tall white kernelled rice selection having medium bold grains with maturity duration of 135-140 days.

Pedigree: Pureline selection from Korgut

Grain quality: Short bold grain type

Grain yield: 2.3 – 2.6 t/ha
(Yield advantage of 33 – 35% over the national check CST 7-1 under stress condition)

Goa Dhan 2 (KS-17)

Team: Manohara, K. K. and Narendra Pratap Singh

It is a high yielding salt tolerant rice line developed through pure-line selection from the local salinity tolerant landrace Korgut, for the coastal saline soils of Goa and adjoining regions.

It is a tall red kernelled selection having medium bold grains with maturity duration of 125-130 days.

Pedigree: Pureline selection from Korgut

Grain quality: Medium bold grain type

Grain yield: 2.6 – 3.0 t/ha
(Yield advantage of 45 – 50% over the national check CST 7-1 under stress condition)
